Solid fire door  
in Epoka finish

# Excellence, in every detail

Designed to meet the most sophisticated market demands, the new R Series represents a vision of uncompromising excellence. Its top-tier features, included as standard, establish an entirely new benchmark in quality. This is where Rizzoli's century-long expertise converges with innovation, shaping a design philosophy rooted in craftsmanship, ongoing research, and absolute precision. Every detail has been carefully engineered to simplify installation within cabinetry, achieving the highest level of integration. This advanced design flexibility completes an exclusive offering, seamlessly adapting to any project.

# New R Series

WOOD - BURNING COOKERS

## The range that suits your space

The New R Series is based on the idea of simplification: a clear and straightforward range, in which each model is identified by the letter R. Models without an oven or with a side-mounted oven, available in various sizes and finishes (Essenza, Stainless steel, Avant, Epoka) to offer maximum freedom of choice. All models come as standard with a triple-glazed fire door and are ready for built-in installation between units, without the need for additional side insulation.

# New R Series: Essenza

## A minimalist, contemporary aesthetic

The Essenza finish embodies a contemporary aesthetic, thanks to the painted steel sides and wood box. It comes as standard with a triple-glazed fire door and a recessed wood box opening, creating a clean, seamless design. The standard configuration features black doors and handles. On request, Essenza can be customised with stainless steel doors and handles, or with frameless glass doors, which enhance the purity of the lines and the continuity of the surfaces. The Essenza finish does not include a solid fire door.

## BASIC CONFIGURATION ESSENZA FINISH

### CHARACTERISTICS

- Black painted fire and oven doors
- Fire door with triple glazing
- Black handles
- Wood box with integrated handle
- Sides in painted steel

### AVAILABLE COLORS

- Black
- White
- Bordeaux Red
- Anthracite
- Sand
- Bronze
- Silver
- Pearl
- RAL (optional)

## FIRE DOORS OPTIONS (optional)

### CHARACTERISTICS

- Stainless steel fire and oven doors
- Stainless steel handles

### CHARACTERISTICS

- Fully glazed fire and oven doors
- Black handles

The fire and oven doors are made entirely of glass, with no frames, for a clean, contemporary look.

# New R Series: Avant

## The harmony of steel and colour

The depth of the coloured surfaces meets the symmetrical stainless steel frames, creating a visual balance that evokes the solidity of tradition reinterpreted in a contemporary key. The Avant finish is an evolution of the Variant finish, and the basic configuration features stainless steel doors and handles on the wood-burning unit, fire and oven door. On request, Avant can be configured with a solid fire door in the same finish and colour as the wood-burning unit, a choice that accentuates the classic style.

## BASIC CONFIGURATION AVANT FINISH

### CHARACTERISTICS

- Stainless steel fire and oven doors
- Fire door with triple glazing
- Stainless steel handles
- Wood box with handle
- Sides in painted steel

### AVAILABLE COLORS

- Black
- White
- Bordeaux Red
- Anthracite
- Sand
- Bronze
- Silver
- Pearl
- RAL (optional)

## FIRE DOOR OPTION (optional)

### CHARACTERISTICS

- Solid fire door in Avant finish

# New R Series: Epoka

## The timeless elegance of tradition

The charm of tradition takes shape in the design through refined decorative details, steel inserts, and ornamental knobs, enhancing the wood-burning cooker with a sense of classic elegance. Three different decorative versions (P46, P56, P59) are available as standard, each designed to add a unique and personalized touch. The base configuration features stainless steel doors, a fire door with handle, and decorative knobs on the oven door and wood box to further emphasize its distinctive character. Upon request, Epoka can be configured with a solid fire door in a matching finish and colour, perfectly coordinated with the cooker.

## BASIC CONFIGURATION EPOKA FINISH

### CHARACTERISTICS

- Stainless steel fire and oven doors
- Fire door with triple glazing
- Fire door with stainless steel handle
- Wood box with stainless steel knob
- Oven door opening with stainless steel knob
- Sides in painted steel

### AVAILABLE COLORS

- Black
- White
- Bordeaux Red
- Anthracite
- Sand
- Bronze
- Silver
- Pearl
- RAL (optional)

## FIRE DOOR OPTION (optional)

### CHARACTERISTICS

- Solid fire door in Epoka finish

RIZZOLI

# NEW STP SERIES

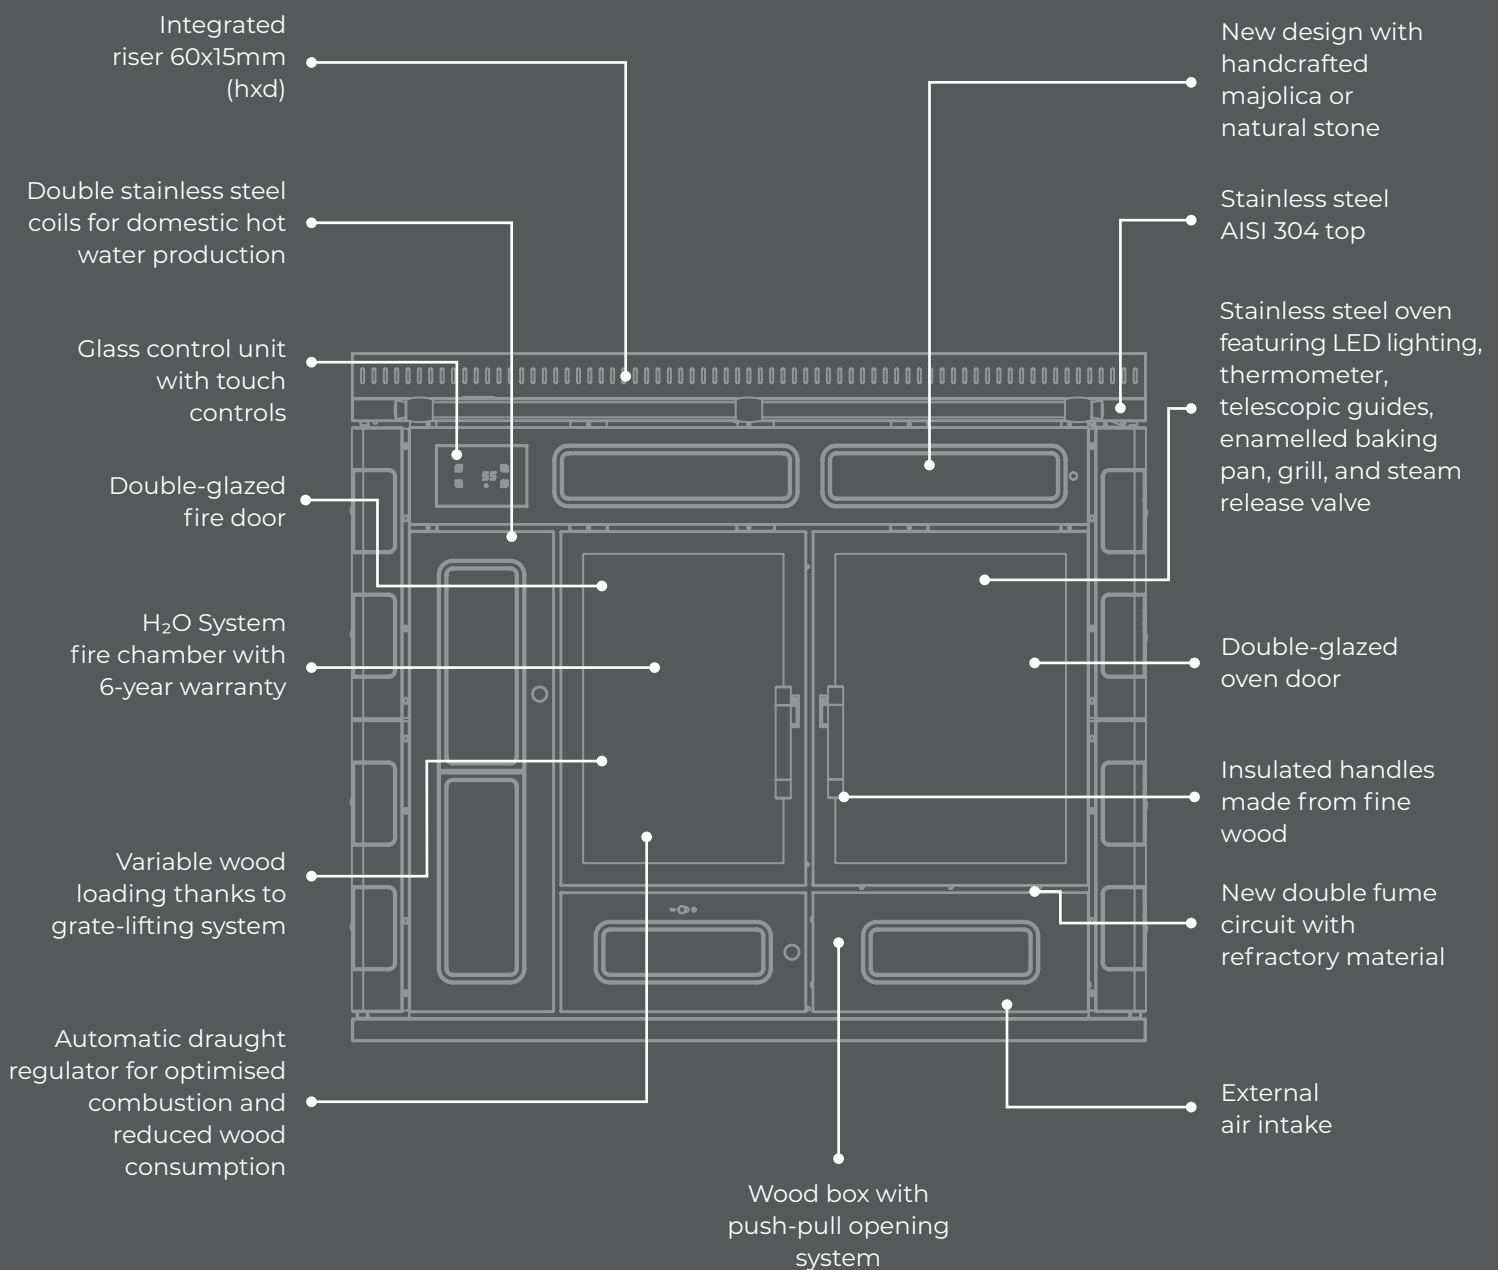

# The evolution of quality.

The STP Series has always represented the pinnacle of Rizzoli wood-burning thermo-cookers, setting the standard in the market for performance, reliability and ease of use.

With an output of up to 30.7 kW, a spacious combustion chamber with a variable wood-loading system and a design intended for intuitive installation, the STP is engineered to deliver warmth, efficiency and everyday comfort. The ability to manage the water for heating and the domestic hot water circuit separately confirms its advanced and comprehensive design. Today, the STP Series evolves: discover how tradition meets a new technical and aesthetic expression.

# New STP Series

WOOD - BURNING THERMO - COOKERS

The new STP Series is enriched with a new look that harmonises beautifully with traditional tastes. Introducing STP Rustica, a finish that enhances the wood-burning thermo-cooker with hand-crafted majolica tiles or natural stone, transforming it into a piece of great aesthetic and historical value.

The warmth that accompanies time.

The experience gained in the field of storage stoves, combined with extensive testing carried out in the laboratories of Rizzoli's Research and Development department, has led to the development of **HeatForm®**, the new thermal storage blocks made from innovative refractory compounds. An advanced solution that improves the stove's overall performance, increases heat storage capacity and significantly prolongs heat release, for a more natural and lasting comfort.

# M SERIES

# Heat takes shape in fire.

The new ML-MZ Series elevates wood-fired cooking with premium features and a distinctive design that places the flame at the heart of the experience. The fire becomes the true focal point, while the spacious oven delivers consistent heat distribution and generous capacity to meet every cooking need. Newly reduced safety distances—now certified at just 3 mm on the sides—enable safe installation between units, offering greater flexibility in design and layout.

# ML Series

# S SERIES

# New S Series: the evolution of fire

In the New S Series, the combustion chamber has been completely redesigned, with a 20% increase in volume, a thick refractory lining and a depth of 410 mm, designed to accommodate longer logs and ensure greater burn time. The new Shiny Glass® system keeps the glass clean for longer thanks to preheated air flows, while the Air Control® automatic primary air management and secondary air adjustment ensure optimal combustion at every stage. Moreover, the certified side safety distance of just 3 mm offers unprecedented installation freedom, without compromising on the features and performance that have made the S Series a benchmark in its segment.

# The authentic wood-fired pizza!

We're pleased to introduce our new refractory pizza stone, an exclusive accessory designed to fit perfectly inside our range of wood-burning cookers with oven.

Crafted from premium-quality refractory material, this stone is engineered to absorb and evenly release heat throughout the oven. The result is consistently excellent performance, allowing you to achieve professional-level pizzas with a perfectly crisp base and uniform cooking.

## CHARACTERISTICS

- High heat-retention firebrick
- Even heat distribution
- Ideal for bread, focaccia, and other leavened products
- Easy to place inside the oven

Rizzoli continuously strives to improve its products. For this reason, the technical and styling characteristics in this catalogue may undergo changes without notice.
