STP range with oven - **STP**

Technical Specifications

H₂O System Certified combustion system

Vent to the Outside

Self-cleaning Double-Glazed Ceramic Glass Fire Door

Stainless steel boiler protection

Control unit with acoustic signals

Instant production of domestic hot water

Integrated safety system with open vessel

Stainless steel coil heat exchange system

Pre-heated Secondary Air

Regulation/Closing of vent to the outside

Front handrail

Side-opening Glass Oven Door

Oven with Steam-conditioning valves

Natural thermal convection on the sides

Steel Radiant Plate

Airtight Fire Door

High thickness steel boiler

Adjustable height wood loading

Integrated heating circuit pump

Domestic hot water prevalence

Ready for installation on a closed vessel system

Primary and Secondary Air automatic regulation

Ignition with Bypass Key

Insulated Handles

Stainless Steel Oven

Oven with Light and Thermometer

Pyrolytic coated baking tray on Telescopic rails and

Oven grill grid

Furniture for Built-in Appliances

Technical Data

Length: 1050 mm

Height: 850 mm

Width: 600 mm

Size of the Oven (lxhwx): 300x279x430 mm

Weight: 300 Kg

Total Nominal Power: 11,3-30,7 kW

Water Nominal Power: 6,5-20,3 kW

Heating Nominal power: 4,7-10,4 kW

Nominal Power Performance: 80,3-70,2%
